## **DETAILED ACTION**

### ***Response to Arguments***

1. In view of the Appeal Brief filed on 11/04/2004, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

2. Claims 1-14 are pending.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

Art Unit: 2135

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 and 10-14 of U.S. Patent No. 6,735,693 B1 (hereinafter referred to as 693' patent) in view of Jackson EP 0911738 A2.

Claims 1-6 and 10-14 of 693' patent contain all elements of claims 1-14 of the instant application except for a disk drive comprising a disk for storing encrypted data; and a circuit for providing plaintext data as recited in claims 1 and 10 of 693' patent. Jackson discloses a Disk drive with data encryption [see abstract] including a disk for storing data [see column 11, lines 24-25, abstract, and figure 2 unit 11], and a circuit for providing plaintext data [see column 11, 42-47, abstract and figure 2]. One of ordinary skill in the art at the time of applicant's invention would have realized such a configuration that includes a disk drive for storing encrypted data and a circuit for providing plaintext data. Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the teachings of Jackson within the claimed limitation of the instant application because it would have provide an advantage by having the encryption decryption circuit as part of the disk it self.
